

# Fly With Us!!

Contrary to media reports about airline travels being unsafe, travelling by airlines has never been as safe as is it now.

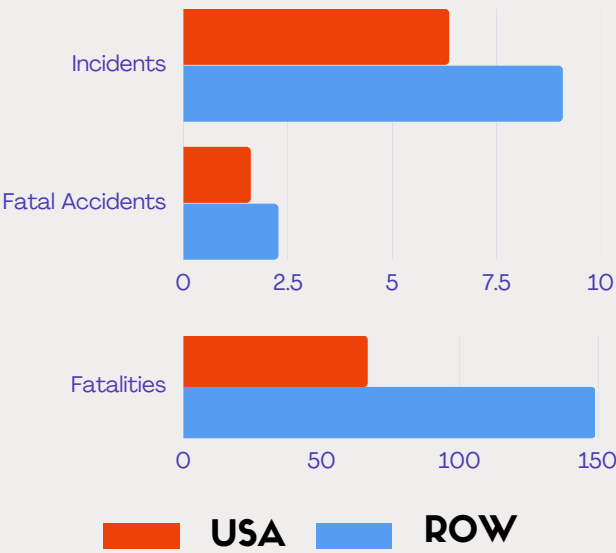

## Auto vs Airlines

Comparing the most widely used transportation methods we can see that the ratio of Fatalities of Auto vs Airlines is 700:1 making Airlines far safer.

## Airline Fatalities

World wide airline fatalities are significantly reducing over the decades because of improving technologies.

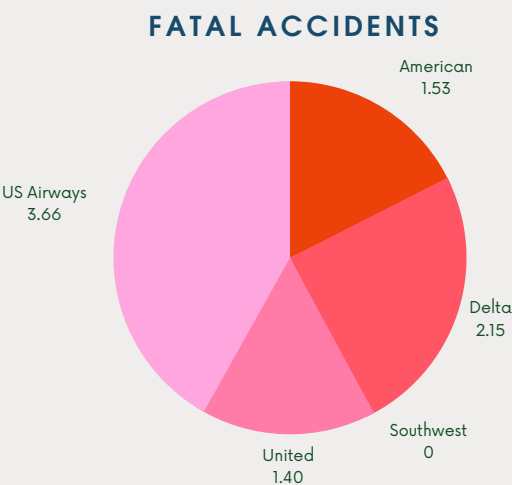

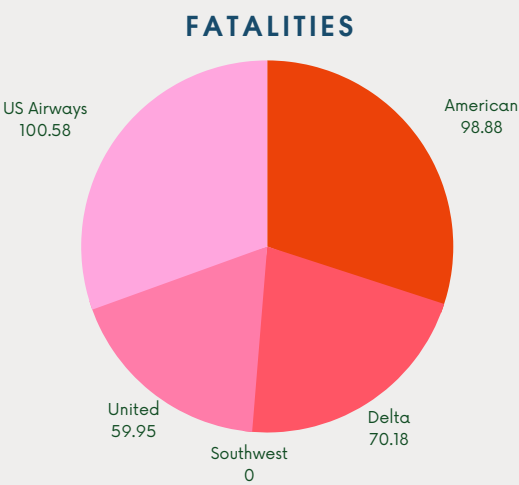

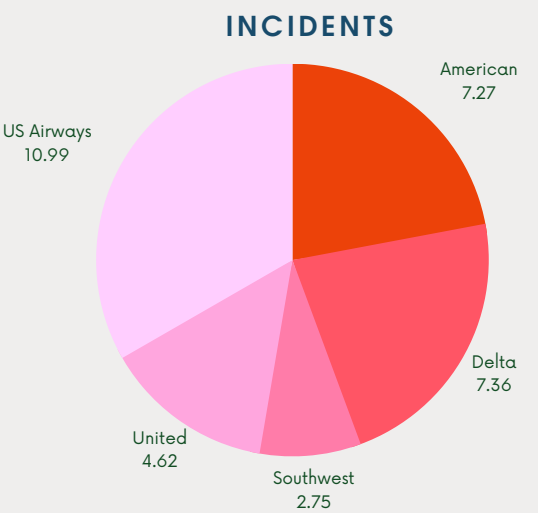

## USA vs ROW Airlines

USA Airlines have the lowest number of Incidents/Fatal Accidents/Fatalities compared to ROW (Rest Of World) Airlines. This is due to the far superior technology and safety procedures from FAA.

## Southwest is safest!

Southwest ranks the lowest in terms of incidents of the top 5 USA Airlines.

Fatal Accidents and Fatalities show Southwest value as 0 and that is not a mistake as we have had no Fatal Accidents or Fatalities!!

Do not rely on the fake media reports about Airline travel being unsafe as USA Airlines rank consistently amongst the top airlines in terms of safety and Southwest Airlines is the safest of them all.
